

```
public class Employee{

    String name;
    int value;

    /**
     * This method does ...
     *
     */
    public boolean equals( Object o ){

        if( ! ( o instanceof Employee ) ){
            return false;
        }

        Employee e = (Employee)o;

        if( e.name.equals( this.name ) && e.value == this.value ){
            return true;
        }
        else{
            return false;
        }

    }

}
```
